Updates this revision also include 2012 Renewals.

Introduction and Overview

Chapter 246-272C WAC establishes sewage tank design and construction requirements, plan review and approval requirements, and prefabricated tank registration requirements. This chapter applies to all prefabricated tanks and all cast-in-place tanks. When the Washington State Department of Health (DOH) has determined that a product meets the registration requirements that are established in the rule, the product will be placed on the “List of Registered Sewage Tanks.” This document is a revision to the previous edition of the “List of Registered Sewage Tanks.”

Overview

Chapter 246-272C WAC On-Site Sewage System Tanks took full effect on December 19, 2009.

1. A prefabricated tank manufacturer or agent shall comply with the registration requirements of Chapter 246-272C-0130 WAC.
2. DOH or the local health officer shall only allow use of prefabricated sewage tanks from the “List of Registered Sewage Tanks.”
3. All prefabricated tank renewal registrations expire on December 31st of the third year of registration.
4. All prefabricated tank renewal applications must be received by the department no later than October 31st of the year the registration expires.

We welcome suggestions to improve this document. If you identify an error or have an idea about how to improve the usefulness of this document, please contact us at wastewatermanagement@doh.wa.gov.
